(7) Domains must provide at least two independent servers on Government-sponsored networks that provide the domain service for translating names to addresses for hosts in this domain.

* If you are applying for a domain and a network number assignment simultaneously and a host on your proposed network will be used as a server for the domain, you must wait until you receive your network number assignment and have given the server(s) a netaddress before sending in the domain application. Sending in the domain application without complete information in Sections 7 and 8 of this template will result in the delay of the domain registration.

Also, establishing the servers in physically separate locations and on different PSNs and/or networks is strongly recommended.

NOTE: All new hosts acting as servers will appear in the DNS root servers but will not appear in the HOSTS.TXT file unless otherwise requested.
